In completing a QEP experience within their field of study, students will be able to

1. delimit and describe the objectives to be accomplished [analysis/synthesis]

2. when appropriate, conduct a search for published work on theory, research, and practices related to the objectives [analysis/synthesis]

3. prepare a plan to achieve the objectives, to include a timetable, description of methods, and description of required resources [synthesis/evaluation]

4. when appropriate, adjust the plan to overcome barriers and/or capitalize on opportunities that arise [synthesis/evaluation]

5. collect and analyze pertinent information and data called for in the plan [application/analysis]

6. discuss the results and conclusions as they pertain to the objectives and present recommendations for future endeavors [synthesis/evaluation]
