FGR-020-001
Bachelor of Science in Communication

Military Science Option
The military science option prepares Florida Tech ROTC cadets to serve as commissioned officers in the United States Army, Army Reserve and Army National Guard. Technical, scientific and military studies are incorporated into the curriculum with emphasis on applied leadership and problem solving skills. Current freshmen and sophomores with no prior military service who seek an ROTC scholarship may attend the Leader’s Training Course between their second and third years. Students incur no service commitment on completion of this course. This 32-day camp provides students with basic military and problem solving skills, combined with physical training.

The bachelor of science degree in communication, military science option, is earned by satisfying the degree requirements listed above and completing the advanced military science program, as described in the Nondegree Programs section of this catalog. All military science (MSC) courses taken are applicable to this degree, with up to 18 credit hours being applicable toward degree requirements, including 12 free elective credit hours and 6 humanities elective credit hours. Students are strongly encouraged to take HUM 3385 as a humanities elective, which counts toward both MSC and humanities. See Nondegree Programs for descriptions of the ROTC program and the sequencing and descriptions of the military science courses.
