RE: Requirements to add MTH1012-Precalculus B in the same semester as taking MTH1011-Precalculus A

With the approval of UGCC new courses MTH1011-Precalculus A and MTH1012-Precalculus B are introduced in Fall semester of 2014. This course is a lecture/lab style. Five hours are required each week: four lab hours and one lecture hour. Lab hours are held in the Math Department’s computational labs, which are open daily M-F, 8:00am – 5:00pm. Both classes are taught with Hawkes software.

The Department of Mathematical Sciences applies the following requirements to add MTH1012-Precalculus B in the same semester as taking MTH1011-Precalculus A.

1) Student must complete all Precalculus A requirements and final exam (with a 90% minimum) by the end of week six of the term. This option is not available in the summer term.
2) A Precalculus B time slot must be available in the student’s schedule.
3) Students must attend a section of Precalculus B. If a student is considering attempting to take Precalculus B early, he/she may wish to attend Precalculus B from the beginning of the term.
4) Students who add Precalculus B are required to fulfill all the required lab and lecture hours of both courses.
5) Students adding Precalculus B must register for the course and pay any additional tuition, if necessary.
